Bunny Care

## BUNNY MAINTENANCE

A GUIDE ON HOW TO CARE FOR YOUR BUN BUN

This guide will help you with things to consider for looking after your bun(s).

# BUNNY CARE

## ENSURE YOU CONSIDER THE FOLLOWING

- 1) **Worming:** every 6-8 weeks.
  - a. Every rabbit should be wormed
  - b. Use Revolution Pink for Puppies and Kittens only
- 2) **Vaccinations:** minimum annually.
  - a. Filofax annual injections are critical (this covers your bun from the calicivirus which is deadly)
  - b. Get this done by your rabbit-savvy veterinarian when you have an annual check up
- 3) **Feed/water:** daily.
  - a. Ensure fresh water
  - b. Ensure the bun has access to unlimited hay
  - c. Ensure your bun(s) have access to a cup of pellets
- 4) **Grooming:** daily.
  - a. Brush coat
  - b. Clip mats off
  - c. Check no poop stuck to butt and fur (check with your vet on how best to handle your rabbit if you find you are having issues)
  - d. Clip nails when required
- 5) **Exercise:** daily.
  - a. Your rabbit needs to exercise daily (this helps keep their digestive system as healthy as possible)
  - b. They love grass, gardens for digging, shaded areas and food/water access
- 6) **First Aid:** on hand.
  - a. It is good to help have some things on hand to help your buns out
  - b. Meloxicam (from your vet only), this is an excellent pain relief
  - c. Vetafarm Origins Insect & Mite spray
  - d. Infant gas drops
  - e. Little syringes to administer liquid medication to
  - f. Critical Care
  - g. Baby wipes
  - h. Grooming mat (to put your rabbits on for grooming and medical handling)
  - i. Eye drops
- 7) **Signs of Being Unwell:** take them to the vet straight away
  - a. Ears back
  - b. Lethargic
  - c. Sitting in a more tucked position than usual
  - d. Not eating/drinking and not interested in treats (such as bananas, oats, continental parsley/kale)
